

NETATMO

Same home, just smarter

Netatmo unveils its Smart Video Doorbell, to greet visitors from anywhere

Las Vegas, 6 January 2019 – [Netatmo](#), the leading smart home company for a safer and more comfortable home, unveils its Smart Video Doorbell.

With the Smart Video Doorbell, the user knows who is ringing their doorbell at any moment. The user can see the visitor on their smartphone and speak to them, and respond immediately even when they are not at home. The Netatmo Smart Video Doorbell also immediately alerts the user if it detects people loitering around the house. It is the first doorbell compatible with Apple HomeKit™ that can be controlled using the Apple Home app or by voice using Siri®.

“The Smart Video Doorbell is an ideal way to never miss a visitor or a package. It is also the best response to the growing need for solutions to secure the home entrance,” says Fred Potter, founder and CEO of Netatmo. *“As with our other products, we have designed the Smart Video Doorbell in compliance with essential principles to guarantee the best smart home experience possible; it’s a useful and reliable product, with thoughtful notifications which ensures our users’ data protection, and without planned obsolescence.”*

Netatmo's Smart Video Doorbell won an award in the 'Home Appliances' category at the prestigious 'CES 2019 Innovation Awards'. It is the 9th Netatmo product to have received such an innovation award in this competition.

Respond to visitors from anywhere

With the Netatmo Smart Video Doorbell, the user knows who has come to see them, wherever they are. When a visitor rings the Doorbell, the user receives a video call on their smartphone and sees their visitor. They can choose to speak to them – or not – and immediately respond remotely from their smartphone whether they are home, in the office or on the other side of the world.

The user can thus tell the delivery person where to leave a package when they are at the office, turn away salespeople without having to open the door, or welcome guests while preparing dinner.

Enhanced security outside the home

Netatmo's Smart Video Doorbell protects the home from intruders and helps the user feel safe in the event of any suspect activity. Thanks to the people detection, the user knows in real time if someone is lurking around the front of their home. A precise 'Person detected' notification is received on their smartphone and a video of the event is recorded.

Using the built-in microphone and speaker, the user can speak to the intruder and deter them from approaching their home.

For added protection, the Security app alerts the user immediately on their smartphone when someone attempts to deactivate the Doorbell or remove it from the wall.

Fully customisable smart notifications

The Smart Video Doorbell settings can be fully customised. The user can switch off notifications and recordings according to their preferences. They can decide whether the Doorbell sends them a notification and records a video when someone is detected.

The user can also set specific alert zones, for example around the main path. The Smart Video Doorbell then only notifies the user when something occurs in these zones.

Exceptional image quality for protection day and night

The Smart Video Doorbell has a 1080p Full HD camera with a large 160-degree wide angle lens giving optimum video quality.

The camera's HDR function adjusts to sudden changes in light and allows the user to clearly see what is happening in front of their home whatever the lighting conditions. This means that visitors' faces will be clear even against the sunlight.

Netatmo's Smart Video Doorbell protects the home day and night using infrared night vision. The user can always see the visitor at their door, even in total darkness.

Easy installation to replace an existing doorbell

The Smart Video Doorbell is easy and quick to install and does not require professional help. It simply replaces an existing doorbell and connects to the home Wi-Fi. It requires a wired doorbell to work. The Smart Video Doorbell is compatible with all electrical installations, from 8-24 volts up to 230 volts.

The user can access the Netatmo Security app on their smartphone, tablet, PC/Mac or Apple Watch. Through the app, the user can access all the functionalities of the Smart Video Doorbell:

specific notifications, access to livestream, call and event history, recordings and storage of HD videos.

No subscription and respects privacy

The Smart Video Doorbell comes with all features included, including video storage. No subscription or additional costs are necessary to use the Doorbell, nor access its data.

Videos and history of calls received by the Video Doorbell are saved locally on an internal micro-SD card. They can also be automatically transferred and archived on the user's Dropbox account or personal FTP server.

In order to ensure a secured transmission of data to the user's smartphone, the Smart Video Doorbell uses end-to-end encryption, guaranteeing the highest level of protection.

Compatibility with interoperability platforms

It has never been so simple to see who is outside your home.

The Netatmo Smart Video Doorbell is the first doorbell compatible with Apple HomeKit. With Apple HomeKit, the user simply receives a rich notification when someone rings, views the Doorbell in the Home app, or can ask Siri to show them the Doorbell to see who is outside the door. The user can also create automations in the Home app to connect their Smart Video Doorbell to other HomeKit-enabled products in their home, according to different combinations. For example, the outdoor lights can switch on automatically when the Smart Video Doorbell detects someone, in order to deter a potential intruder.

The Smart Video Doorbell is also compatible with IFTTT, a platform which connects different apps, connected devices and web services.

An elegant design and weatherproof

With its compact and elegant design, the Smart Video Doorbell fits perfectly at the entrance to any home.

Protected by HZO technology, an innovative nano-film, the Doorbell is fully resistant to all weather conditions - rain, snow, humidity - as well as dust and dirt.

Availability

Netatmo's Smart Video Doorbell will be available for purchase in the second half of 2019.

The Netatmo Security app is completely free and compatible with iPhones and iPads with iOS 10 or above and Android smartphones and tablets from 5.0.

The Netatmo Web app is available on Mac and PC.

About Netatmo

Netatmo is a leading smart home company creating simple, beautiful smart solutions for a safer and more comfortable home. The company's ambition is to bring useful technology, to the most intimate place you own. In order to pursue this goal, Netatmo follows four commitments that embody the company's DNA:

- Durable design: no planned obsolescence.
- Privacy at its core: from the conception phase, we ensure that we can guarantee data protection.
- Useful & reliable: our products make your life easier.
- Thoughtful notifications: we notify you only when it is important.

Since 2012, Netatmo has launched thirteen devices and accessories to meet the main demands of the smart home industry. The company offers different solutions to automate the home and make life easier, from its first product in 2012 to today. In addition to its main product range, Netatmo collaborates with key

industrial leaders with its “with Netatmo” program to expand its reach and continue to grow strategically with smart integrated solutions that fit in your home’s infrastructure. Thanks to this strategy, Netatmo can bring simpler, easier and better home experiences.

In November 2018, Netatmo joined the Legrand Group, the global specialist in electrical and digital building infrastructures.

Netatmo, same home, just smarter.
