

Smart Smoke Alarm - Life span for typical use

Manufacturer: Name: Netatmo
Address: 93 rue Nationale
92100 Boulogne-Billancourt
France

Equipment: Model number: NSD01
Marketing name: Netatmo Smart Smoke Alarm

The Netatmo Smart Smoke Alarm is an intelligent, connected smoke alarm that delivers real-time alerts to your smartphone whenever the alarm is triggered, so you can take action even when you're away from home.

As it is recommended to replace all smoke alarms after 10 years, we have engineered a unique 10-year battery that lasts the entire lifetime of the product, so you can forget about changing batteries and enjoy the peace of mind of a fully protected home.

Hereby, Netatmo declares that this NSD01 handles its 10-year battery with the following typical use:

Events	Occurrences over 10 years	Comments
Installation	5	Once the Smart Smoke Alarm is installed there is no need to reinstall it later except in case of relocation.
Smoke detected	10	The Smart Smoke Alarm is a photoelectric smoke alarm which detects smoke optically. Certified to the highest CE, NF, Q-Label and LPCB technological standards, the Smart Smoke Alarm is precision-engineered to prevent false alarms.

Desactivate	20	The hush feature allows you to deactivate the Smart Smoke Alarm's siren for 15 minutes in case of smoke detection or to report the battery alarm.
Sound test	10	Netatmo recommends testing the Smart Smoke Alarm's siren at least once a year.
Tampered	10	The Smart Smoke Alarm is tampered when it is unmounted.
Dusty	10	Notification in case of dusty sensor.
Low battery	5	Your product will let you know regarding its battery level.
Firmware update	30	Netatmo regularly provides firmware updates.
