

The Netatmo Smart Video Doorbell is now compatible with the main voice assistants: Google Assistant, Amazon Alexa and Siri

Paris, France, May the 11th 2021 - Netatmo, the leading French smart home company for a safer and more comfortable home, announced today the compatibility of its Smart Video Doorbell with the main voice assistants: Siri, Google Assistant and Amazon Alexa.

The Smart Video Doorbell has been compatible with Apple HomeKit since its launch. Now, thanks to a software update, users will also benefit from Amazon Alexa and Google Assistant compatibility. This free automatic update will be deployed gradually over the next few days to all Smart Video Doorbells, including those already purchased.

The Netatmo Smart Video Doorbell makes it possible to see who is at the door and to answer it from anywhere. When someone rings the Doorbell, the user receives an alert on their smartphone and can then talk to their visitors. The Doorbell also helps secure the home's entrance as it alerts the user in real time if it detects someone lurking around the front door.

With Amazon Alexa, the user can easily keep an eye on their home

From today, the Netatmo Smart Video Doorbell will be compatible with Amazon Alexa. With a simple voice command ("Alexa, show me the Doorbell"), the user can see what is happening outside their home in real time on their Echo Spot or Echo Show.

When someone rings the Doorbell, Alexa notifies the user, who can then talk to their visitor through their smart speaker¹. The user can use voice commands if they want to start a conversation with their visitor ("Alexa, answer the Doorbell").

Google Assistant, for checking quickly who is at the door

The user can now connect their Netatmo Smart Video Doorbell to their Google Assistant, which will alert them through the smart speaker (Google Nest Hub, Google Nest Mini, etc.) when someone rings the Doorbell.

¹ Compatible with the entire Amazon Echo and FireTV range

This compatibility also allows the user to stream live video from the Doorbell to a Google Nest Hub or Google Nest Hub Max. With a simple voice command (“Hey Google, show me the Doorbell”), they can see what is happening outside their home in real time.

Custom scenes with Apple HomeKit

The Smart Video Doorbell has been compatible with Apple HomeKit since its launch. This means the user can create custom scenes to connect their Doorbell to other smart home devices, according to different combinations. For example, when the Smart Video Doorbell detects a person, the home’s outdoor lights can switch on automatically to deter any potential burglars.

With HomeKit, the user can use voice commands to access live footage captured by their Smart Video Doorbell. They can ask Siri to show them their front door to find out what is happening at home (“Hey Siri, show me the Doorbell”).

Availability

This latest voice assistant integration follows that of the Netatmo Smart Cameras, the Netatmo Smart Thermostat and the Netatmo Smart Radiator Valves, all of which are compatible with Siri, Amazon Alexa and Google Assistant.

The Netatmo Smart Video Doorbell retails for \$299,99. The product is available online on www.netatmo.com, www.legrand.us and Amazon.com.

The Netatmo Security app is free and compatible with iPhones and Android smartphones.

About Netatmo

Netatmo is a leading smart home company that creates simple and smart products for a safer, more comfortable home.

Since its launch in 2012, Netatmo has been committed to designing and marketing products that are:

- All-inclusive: no subscription fees or extra costs
- All-secure: data protection and privacy guaranteed
- All-upgradeable: free upgrades and features added regularly

To date, Netatmo has launched 13 smart home devices and accessories. Helpful and simple to use, these products make everyone’s day-to-day life easier while improving well-being at home.

In addition to its consumer product lines, the company collaborates with key leaders from the building industry through its “with Netatmo” program to develop smart solutions that integrate into the home’s infrastructure.

In 2018, Netatmo joined the Legrand Group, a global specialist in electrical and digital building infrastructures.

Netatmo, same home, just smarter.
