

# NETATMO

presence

Outdoor security camera with  
people, car and animal detection

PRODUCT BOOK

## Presence – a breakthrough in outdoor home security

Netatmo Presence is the first outdoor security camera that **detects and reports people, cars and animals**. It analyses and alerts in real-time if someone loiters around your home, a car enters your driveway or an animal is in your yard.

With Presence, you can check in on your home through **livestream from anywhere and any device**. Customise notifications to fit your needs: choose to receive alerts about any combination of people, cars and animals, or for all three.

The **integrated floodlight** helps you find your way safely at night and deters any unwanted visitors. It can be set to switch on when Presence detects a person, a car or an animal.

Presence **simply installs as an outdoor light**. Just replace one of your existing outdoor light fixtures and connect through Wi-Fi.

There is no subscription fee. Storing your videos is completely free.

## Complete and easy-to-install security system

### BE ALERTED ABOUT WHAT MATTERS

Smart-Sight lets you know exactly what happens in front of your home—you know if there's a person, a car or animal.

### INTEGRATED SMART FLOODLIGHT

The integrated smart floodlight detects unwanted visitors and lights up the way.

### SIMPLY INSTALLS AS AN OUTDOOR LIGHT

In just a few minutes you have a smart security system with a powerful floodlight for protection day and night.

## Revolutionary outdoor security

### SMART-SIGHT

Smart-Sight uses a breakthrough deep learning algorithm to detect and report the presence of people, cars and animals.

### ALERT-ZONES

The Alert-Zones feature allows you to choose specific areas for alerts – you know instantly when someone enters a zone you selected.

### SMART FLOODLIGHT

Presence's smart floodlight deters any unwanted visitors and lights up your way at night.

### CUSTOM ALERTS

Customize notifications to fit your needs: choose to receive alerts about a combination of people, cars and animals, or for all three.

## A powerful experience

### STUNNING FULL HD VIDEOS

Enjoy stunning Full HD 1080p videos in any light condition.

### SUPERIOR NIGHT VISION

At night, choose to switch the floodlight on or watch discreetly with Presence's high-powered infrared LED night vision.

### INSTALLS AS AN OUTDOOR LIGHT

Presence simply replaces one of your existing outdoor light fixtures. In a few minutes you have a sophisticated security system with a powerful floodlight.

### ULTRA-LONG DETECTION

Presence is able to detect people, cars and animals up to 20m/65ft. Customize the detection distance as you need it.

## Free and secure video storage

### MICRO SD CARD STORAGE

Recorded videos and identification data stay entirely private thanks to the camera's local microSD card. A microSD card is included.

### BACKUP SCREENSHOT

A screenshot of each event is the only thing stored in the Netatmo cloud – and nothing else. The camera selects the clearest image of each event.

### OPTIONAL CLOUD STORAGE

Choose to store videos automatically on your personal Dropbox cloud or FTP server.

### SECURE BANK-LEVEL ENCRYPTION

Bank-level and end-to-end encryption is used to guarantee the highest level of protection.

## Optional Dropbox or FTP storage

### MICRO SD CARD STORAGE

The video is recorded by Presence and automatically stored on its internal micro SD card.

Automatic  
storage

### OPTIONAL DROPBOX OR FTP STORAGE

Additionally, you can choose to backup videos immediately on your personal Dropbox account or FTP server.

Optional  
storage

FTP

## No extra fees

### FREE VIDEO ACCESS

Access your videos and live stream through the Security app – anytime, anywhere, on any device.

### FREE VIDEO STORAGE

There is no subscription, no contract and no fee. Storing your videos is free on the included microSD card, with the option of using your Dropbox account or your FTP server as additional storage.

- ③ Pair Presence with your phone by following the instructions on the app

## Setup

**REQUIREMENT:**  
Wi-Fi Internet  
connection

**RECOMMENDED:**  
Height: 2.5 to 4  
metres 8-14 ft

**RECOMMENDED:**  
Tilt angle: 30°

## FAQ Netatmo Presence

### Use

- How can I access my videos?

Your videos can be easily accessed through the Security App on your smartphone, tablet, PC/Mac or Apple Watch.

- How many people can have access to the camera?

As many people as you wish can have access to the camera via the App.

- How many cameras can I connect to the App?

An unlimited number of Presence cameras.

- How many videos does Presence record?

The number of video clips depends on how long a video is and the size of the microSD card used. With the included microSD card you can usually store more than 100 video sequences on average.

# FAQ Netatmo Presence

- Can I link Presence with another Netatmo Product?

Yes, Presence works with the Netatmo Welcome camera and the Netatmo Tags. For example, when a particular family member is seen home by Welcome, you can choose to deactivate Presence's recording. Also, as Presence is compatible with IFTTT you can create smart scenarios with other connected products as well.

- Is there face recognition?

No, there is not, Presence uses a different technology than face recognition to analyse and report people, cars and animals. It works by detecting the entire form of a moving object. Therefore, Presence can see a person from a distance and recognize that it is a person even when their faces are too small and too far to be recognized by the human eye.

- What if I don't want to be notified about certain things but still record them?

In Presence's settings, you can choose to turn off notifications for certain events but still have them be recorded and appear on the timeline.

- What are Alert-Zones?

The Alert-Zones feature allows you to select specific areas for alerts – you know instantly when someone enters a zone you selected. They're a great way to receive only the alerts you're interested in.

- How many Alert-Zones can I define?

You can select up to four Alert-Zones.

- What is the smart floodlight?

The integrated smart floodlight detects unwanted visitor and lights up the way. It can be set to switch on when Presence detects a person, car or animal.

- Can I choose what the floodlight will turn on for?

Yes, the floodlight can be set to turn on when Presence detects people, cars, animals, or for all three. It can also be manually switched on in the App.

# FAQ Netatmo Presence

## Specifications

- What is Smart-Sight?

The Smart-Sight feature uses a breakthrough deep learning algorithm to detect the presence of people, cars and animals. It lets you know exactly what happens in front of your home.

- Is there audio?

Presence has one-way audio, so all videos will be recorded with sound.

- Is Presence weatherproof?

Yes, Presence has an HZO protection, which means sand, wind, rain, hail, ice or sun are no issue.

- How far and wide of an area can Presence see?

Presence has long range detection of up to 20m (65 ft), and a 100° field of view.

- What is the range of night vision?

Presence's infrared night vision can detect shapes up to 15m (50ft) away.

- How much energy does Presence use?

The average power consumption during the day is 5W. At night, because of the floodlight, the average power consumption is 15W when the light is on.

- Are my videos secure?

Yes, bank-level and end-to-end encryption is used to guarantee the highest level of protection

# FAQ Netatmo Presence

## Setup

- Where should I place Presence?

Ideally Presence replaces an existing light fixture outside your home. It is designed to be placed at a height between 2.5-4 m (8-14 ft) for optimum performance.

- How is Presence installed?

Presence installs as an outdoor light. It simply replaces one of your existing outdoor light fixtures.

- Can I install my camera without replacing an existing light fixture?

Yes, you will need to find a power source and install it as a new outdoor light fixture. It is recommended to contact a qualified electrician.

- How is Presence powered?

Presence's power source is the same as of any traditional lamp at home: two cables carrying 100V or 240V, depending on your region.

- Will I receive a notification when the camera has no power?

Yes, a notification will be sent to your smartphone.

- Will I have a Wi-Fi connection problem because of the distance between Presence and my router?

Presence is designed for outdoors and has a very powerful Wi-Fi antenna so that communication is optimised.

- What happens if there is no internet connection?

You receive a notification that there is no internet connection. As long as it is powered, Presence still works and records videos, but it cannot send new videos to the app without internet. Presence will add all the new videos to the app once there is an internet connection again.

# FAQ Netatmo Presence

## Storage

- What is the maximum SD card size I can use for my Presence?

The maximum SD card size that is compatible with Presence is 32 GB class 10.

- Can I backup videos on the cloud?

Yes, you can connect Presence with your Dropbox account or your personal FTP server to store videos additionally on the cloud.

- How does FTP work?

Your videos will always be encrypted and also stored on Presence's microSD card, plus, if you activate Dropbox or FTP in your app's settings, they will be instantly stored on your personal server as an additional backup. In the app settings you can choose to connect your camera with your FTP account.

- How does Dropbox work?

In the app settings you can choose to connect your camera with your Dropbox account.

- What is stored in the Netatmo cloud?

There is only a backup screenshot of each video stored for free in the Netatmo cloud. The camera selects a screenshot with the clearest photo of each event. Screenshots are sent through a bank-level encrypted connection to your device.

- What is stored on the camera?

Videos are stored locally on the cameras internal microSD card. Remove the microSD card and the videos are removed from the camera.

- What is stored in the App?

No videos and no screenshots are stored on the App or on your mobile device. All videos are stored on the camera and sent through an end-to-end encrypted connection to your App.
